

Password Key generation

Download utilities Putty and Puttygen

<https://www.putty.org/>

The screenshot shows a web browser window with the address bar displaying `chiark.greenend.org.uk/~sgtatham/putty/latest.html`. The browser's bookmark bar is visible with various links. The main content area has a light green background and is titled "Alternative binary files". It contains a paragraph explaining that the installer packages provide versions of the binaries, but standalone binaries can be downloaded individually. A note suggests reading the FAQ entry for 32-bit vs 64-bit versions. Below this, two sections list download links for `putty.exe` and `puttygen.exe` in 32-bit and 64-bit versions, each with links for "signature" and "or by FTP".

Alternative binary files

The installer packages above will provide versions of all of these (except PuTTYtel), but you can download standalone binaries one by one if you prefer.

(Not sure whether you want the 32-bit or the 64-bit version? Read the [FAQ entry](#).)

putty.exe (the SSH and Telnet client itself)

32-bit:	putty.exe	(or by FTP)	(signature)
64-bit:	putty.exe	(or by FTP)	(signature)

puttygen.exe (a RSA and DSA key generation utility)

32-bit:	puttygen.exe	(or by FTP)	(signature)
64-bit:	puttygen.exe	(or by FTP)	(signature)

Generate/Convert Private Key through Puttygen

 puttygen.exe
